INDEPENDENT AUDITOR' S LIMITED ASSURANCE REPORT ON SUSTAINABILITY REPORTING

To the General Meeting and Supervisory Board of Grupa Kęty S.A.

Assurance opinion

We have conducted limited assurance engagement on the sustainability report of Capital Group Grupa Kęty S.A. („Group”), in which Grupa Kęty S.A. is the parent entity (the “Parent Company”), prepared as at 31 December 2025 and for the period from 1 January 2025 to 31 December 2025, included in the section ‘Sustainability Statement’ of the Report of the Management Board of Grupa Kęty S.A. on the operations of the Company and the Capital Group in 2025, including information incorporated by reference (the ‘Sustainability Statement of the Capital Group’).

Based on the procedures we have performed and the evidence we have obtained, nothing has come to our attention that causes us to believe that:

- (i) the consolidated sustainability reporting is not compliant, in all material respects, with the requirements of Chapter 6c of the Accounting Act dated 29 September 1994 („Accounting act”), including the European Sustainability Reporting Standards („ESRS”),
- (ii) the process carried out by the Group to identify the information reported in the sustainability reporting („Materiality assessment process”), has not been compliant, in all material respects, with ESRS,
- (iii) the consolidated sustainability reporting is not compliant, in all material respects, with reporting requirements provided for in Article 8 of Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment, and amending Regulation (EU) 2019/2088 („Taxonomy Regulation”).

Basis for opinion

We conducted our limited assurance engagement of the sustainability reporting in accordance with National Standard on Sustainability Reporting Assurance Engagements 3002PL, Limited assurance engagements on sustainability reporting (“NSAE 3002pl”) and as appropriate National Standard on Assurance Engagements other than Audits and Reviews 3000 (Revised) in the wording of International Standard on Assurance Engagements (ISAE) 3000 (Revised), Assurance Engagements Other than Audits or Reviews of Historical Financial Information (“NSAE 3000”).

The level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed since the procedures in a limited assurance engagement performed by the statutory auditor of sustainability reporting assurance vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement.

Our responsibilities under these standards are further described in the section of our report entitled “Responsibilities of the statutory auditor carrying out the assurance of consolidated sustainability reporting”.

We are independent of the Group in accordance with ethical requirements stipulated in the Handbook of the International Code of Ethics for Professional Accountants (including International Independence Standards) as adopted by the National Council of Statutory Auditors (“IESBA Code”) that relate to assurance engagements, the Act of 11 May 2017 on Statutory Auditors, Audit Firms and Public Oversight (the ‘Act on Statutory Auditors’) and the Regulation (EU) No. 537/2014 of the European Parliament and of the Council of 16 April 2014 on specific requirements regarding statutory audit of public-interest entities and repealing Commission Decision 2005/909/EC that are

**Shape the future
with confidence**

relevant to assurance engagements of the sustainability reporting, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code.

Our firm applies National Standard on Quality Control 1 in the wording of International Standard on Quality Management 1, Quality management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements, which requires the firm to design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our limited assurance engagement opinion

Responsibilities of the Management Board and Supervisory Board of the Capital Group for sustainability reporting

The Management Board of the Parent Company is responsible for:

- preparation of the consolidated sustainability reporting in compliance with Chapter 6c of the Accounting Act, including ESRS,
- conducting Materiality assessment process in compliance with ESRS,
- preparation of the consolidated sustainability reporting in compliance with Article 8 of the Taxonomy Regulation,
- designing, implementing and maintaining such internal controls that Management Board of the Parent Company determines are necessary to enable the preparation of the sustainability reporting in compliance with the Chapter 6c of the Accounting Act, including ESRS, and Article 8 of the Taxonomy Regulation, that is free from material misstatement, whether due to fraud or error,

as part of the above the Management Board of the Parent Company is responsible for design and implementation of the Materiality assessment process and for its disclosure in the consolidated sustainability reporting. This responsibility includes among others:

- understanding the context in which the Group's activities and business relationships take place and developing an understanding of its affected stakeholders,
- the identification of the actual and potential impacts (both negative and positive) related to sustainability matters, as well as risks and opportunities that affect, or could reasonably be expected to affect, the Group's financial position, financial performance, cash flows, access to finance or cost of capital over the short-, medium-, or long-term,
- the assessment of the materiality of the identified impacts, risks and opportunities related to sustainability matters by selecting and applying appropriate thresholds; and
- making assumptions that are reasonable in the circumstances.

The Management Board of the Parent Company is also responsible for selection and use of appropriate methods to report sustainability matters and produce estimates or forward-looking information to be disclosed in the sustainability reporting, that are reasonable in the given circumstances.

The Supervisory Board of the Parent Company is responsible for overseeing the sustainability reporting.

Inherent limitations in preparing the sustainability reporting and in measurement and evaluation of related matters

**Shape the future
with confidence**

There are inherent limitations associated with measurement or evaluation of the sustainability reporting that is subject to limited assurance engagement, that are presented below:

- In reporting forward-looking information in accordance with ESRS, the Management Board of the Parent Company is required to prepare the forward-looking information on the basis of disclosed assumptions about events that may occur in the future and possible future actions by the Group. The actual outcome is likely to be different since anticipated events frequently do not occur as expected.
- The quantification of greenhouse gas emissions is subject to significant inherent measurement uncertainty resulting from the estimation of certain input data and the limited scientific knowledge used to determine emission factors and the values applied to convert emissions of other gases into CO₂ equivalents.
- In determining the disclosures to be presented in the sustainability reporting, the Management Board of the Parent Company interprets undefined legal and other terms. Undefined legal and other terms may be interpreted differently, including the legal conformity of their interpretation and, accordingly, are subject to uncertainties.

Responsibilities of the auditor carrying out the assurance of sustainability reporting

Our objectives are to plan and perform the assurance engagement to obtain limited assurance about whether the consolidated sustainability reporting is free from material misstatement, whether due to fraud or error, and to issue a limited assurance report that includes our opinion. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence decisions of users taken on the basis of the consolidated sustainability reporting as a whole.

As part of a limited assurance engagement in accordance with NSAE 3002pl we exercise professional judgement and maintain professional skepticism throughout the engagement.

Our responsibility on the sustainability reporting related to the Materiality assessment process includes:

- obtaining understanding of the Materiality assessment process to evaluate its compliance with ESRS, but not for the purpose of providing opinion on operating effectiveness of this process, including its outcome,
- designing and performing procedures to evaluate whether the Materiality assessment process is consistent with the description of the process in the consolidated sustainability reporting.

Our other responsibilities related to the sustainability reporting include:

- obtaining an understanding of the entity's control environment, processes and information systems relevant to the preparation of the consolidated sustainability reporting but not evaluating the design of particular control activities, obtaining evidence about their implementation or testing their operating effectiveness,
- identifying disclosures where material misstatements are likely to arise, whether due to fraud or error,
- designing and performing procedures responsive to disclosures in the consolidated sustainability reporting where material misstatements are likely to arise. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

Summary of the work performed

Limited assurance engagement involves performing procedures to obtain evidence about the consolidated sustainability reporting. We have designed and performed our procedures to obtain evidence on the consolidated sustainability reporting that are sufficient and appropriate to provide

a basis for our opinion. The nature, timing and extent of procedures selected depend on professional judgement, including the identification of disclosures where material misstatements are likely to arise, whether due to fraud or error, in the consolidated sustainability report. We exercised professional judgement and maintained professional skepticism throughout the engagement.

In conducting our limited assurance engagement, with respect to the Materiality assessment process, we, among others:

- performed inquiries to understand how the Materiality assessment process was designed and carried out,
- reviewed internal documentation of the Group related to the Materiality assessment process,
- evaluated whether the evidence obtained from our procedures was consistent with the description of the Materiality assessment process set out in the consolidated sustainability reporting.

In conducting our limited assurance engagement, with respect to the consolidated sustainability reporting, we:

- performed inquiries to obtain an understanding of the reporting processes relevant to the preparation of the consolidated sustainability reporting, but not for the purpose of providing opinion on operating effectiveness of controls,
- evaluated whether the structure and the presentation of the Group's sustainability reporting is in accordance with the ESRS,
- performed inquiries of employees of the Parent Company involved in the preparation of the Capital Group's sustainability reporting regarding selected information,
- we performed analytical procedures on selected information included in the Capital Group's sustainability reporting,
- evaluated correctness of calculation for selected metrics,
- we evaluated the methods, assumptions and data used in the preparation of estimates and forward-looking information,
- we performed appropriate assurance procedures with respect to the information incorporated by reference,
- obtained an understanding of the process to identify taxonomy-eligible and taxonomy-aligned economic activities and the corresponding disclosures in the consolidated sustainability reporting,
- where applicable, we reconciled the presented information and the underlying input data to the relevant records, accounting books or other source documents from which they originate
- where applicable, we evaluated consistency of information and disclosures presented in the consolidated sustainability reporting with corresponding disclosures presented in the annual financial statements and management report.
